1. Courses

- Students need to take 50% of the courses within the department of the contract. Furthermore, students can list preferred courses within the Faculty of Science, but admittance to the courses will depend on their background and knowledge, of course. They can also apply for courses at other faculties, but placement for courses outside the faculty is very difficult, especially the master courses (if concerning master students).

2. Proof of language

- With your university we have an agreement for Logic. The department of Logic has made the English test an obligatory component of the application, so yes, an official proof of English proficiency will be required.

- We need an official proof as the department requires this, and it is also an official requirement for the (entire) programme.
