Teneriffa:

Here you can find the semester in which every courses are taught: http://www.ull.es/view/centros/psicologia/Plan_de_estudios_2/es

It is important to notice that any annual course can't be attended just for a semester because it will be not possible to get the marks.

Concerning the courses you are interested in, I can tell you the following:

- Psicopatología (PG). It is an autumn course, so the student must attend it between september and february.
- Tratamientos Psicológicos (TPS). It is an annual course. The student must be here during the whole academic year (between september and june-july) to get the marks.
- Psicometría (PSI). It is an autumn course. The student has to attend it between september and february.
- Prejuicio y Discriminación (Py D). It is an autumn course. The student has to attend it between september and february.
- Psicología Comunitaria (PC). It is an autumn course. The student has to attend it between september and february.

These two latter are optativas and with a limited number of students. So the student must get a seat in them from the first moment he/she wants to come and attend them.

Finally, for this coming academic year it will be necessary to send the document with the level of Spanish (B1). I will send this information to all the coordinators in a few days.
